3. Go to
Control panel -> Search Java -> Click on java

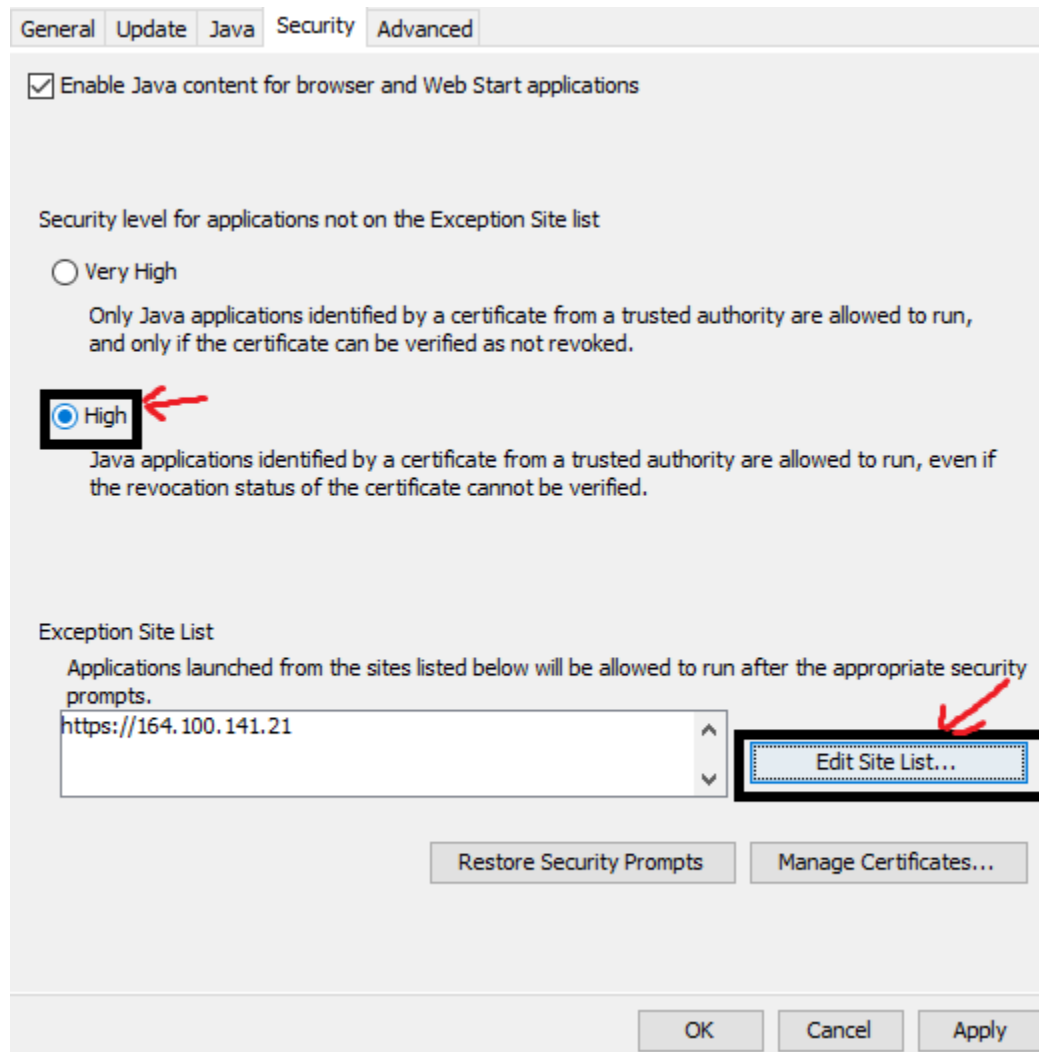

After that underlying screen will show → Click on Security

Enable

Java Content in the browser, Security level High and click on edit site list.

The image shows a screenshot of the Java Security settings dialog box. The 'Advanced' tab is selected. The 'Enable Java content for browser and Web Start applications' checkbox is checked. Under 'Security level for applications not on the Exception Site list', the 'High' radio button is selected and highlighted with a red box and a red arrow. Below this, the 'Exception Site List' section contains a text box with the URL 'https://164.100.141.21' and an 'Edit Site List...' button, which is also highlighted with a red box and a red arrow. At the bottom, there are buttons for 'Restore Security Prompts', 'Manage Certificates...', 'OK', 'Cancel', and 'Apply'.

File signed successfully.

13. Once the report is digitally signed the Signature status will be changed, previously it was showing Unsigned now it will show Signed.

NOTE:- (The same process will be followed for registering Executive Engineer)

Once all the generated reports are signed both by DAO And EE, Account can be submitted to AG. AG has the functionality to view those signed reports.
